

The Town of Columbine Valley under permit with the Colorado Department of Public Health and Environment, and by direction from the Environmental Protection Agency and the Clean Water Act, administers the National Pollutant Discharge Elimination System (NPDES).

As part of the NPDES Permit, the Town of Columbine Valley's Stormwater Management Program monitors stormwater quality as it relates to construction. The goal of the program is to provide information and direction to developers, contractors, as well as citizens, regarding stormwater quality as it relates to construction. The program has been developed with the following objectives in mind:

- Reduce soil loss from all construction sites to the maximum extent possible
- Improve the water quality of stormwater runoff to the maximum extent possible
- Prevent accumulations of soil and debris in the storm sewer system
- Prevent discharges of chemicals, chemical wastes, and other pollutants
- Prevent migration of construction debris off site
- Prevent damage to adjacent properties arising from sediment, debris, or other pollutants
- Protect state waters and wetlands from damage caused by erosion, sedimentation, chemical wastes, or other pollutants arising from construction activity.

Citizens, developers, and contractors doing work in the Town are held to the requirements of ***Section 8.12.070 of the Municipal Code of the Town of Columbine Valley and Appendix K of the International Building Code***. Citizens, developers, and contractors are required to remove all refuse such as plaster, broken concrete, bricks, cylinder blocks, stones, wood, roofing material, loose or discarded or unused material of any kind, resulting from the construction site, promptly, so as to prevent such debris from being scattered about the Town, which, include those areas of the Town where stormwaters flow.

The citizen, developer, and/or contractor doing work in the Town must install and maintain erosion and sediment prevention measures in accordance with ***UDFCD, Vol. 3 BMP Criteria Manual***. Copies of typical construction site stormwater Best Management Practice plans for these measures are included herein.

Enforcement of the Town's Stormwater Management Program begins when deficiencies are present at the existing construction site. The Town may impose the following enforcement actions:

1. Verbal warning to the Contractor detailing requirements for compliance
2. Written notice from to contractor stating problems and suggested solutions
3. Notice of violation letter with deadline to comply give to the project owner
4. Issuance of red-tag (stop work order)
5. Cashing of surety to correct the deficiency on the site

All permit holders, by signing below, understand the above stated requirements:
